

Before Using A Nitro Car

Important Prechecks before using any nitro model:

- 1) Receiver Battery
- 2) Range check (Stand a distance away from the model and make sure it is responding to the radio control correctly).
- 3) Radio Battery
- 4) Glow Plug is tight and glow start is fully charged
- 5) Ensure engine flywheel is tight and tighten if needed.
- 6) Loctite/tighten any loose nuts, screws or bolts. e.g: set screws, engine mount screws, wheel nuts, etc
- 7) Clutch-bell and Spur Gear mesh.
- 8) Pullstart engine screws
- 9) Nylon ties for exhaust
- 10) Clean & Re-Oil or replace Foam Air Filter element if needed
- 11) Ensure all servo & throttle linkage is straight at 90 degrees & in proper alignment when the radio equipment is turned on. Adjust if needed.
- 12) Ensure fuel system is free of obstruction, line pinches, dirt & leaks
